SV-W-D5

The SV-W-D5 smoke damper has been designed for smoke evacuation and control within lobbies and are installed into extract shafts in multi-level buildings, to maintain tenable conditions in the common escape routes in the event of a fire. The dampers are designed to work in fan power extract systems. Air is pulled through the damper and into the extract shaft.

Blades

0.7mm galvanised (BS EN10346 DX-51D+Z275) double skin matt black painted aerofoil 100mm pitch damper blades which interlock when closed.

Application

Mechanical Ventilation

Actuator Recess

Actuator is on lobby side, concealed from view behind a black painted removable cover and can be manually operated if required.
